

KIWICARE®

LawnPro All in One Feed and Weed

LawnPro All-in-1 is an easy to apply granule to control weeds and moss in lawns while feeding and greening. It is available in a spreader bottle – with a built in spreader head, and as a refill pouch.

www.kiwicare.co.nz

Background

LawnPro All in One is an innovative product for easy application of nutrients, weed control and moss killer to lawns. The Even-Flo™ spreader device makes even and accurate application of granules as easy as walking on the lawn with no hand spreading. The unique ball design spreader creates a perfect, even spread of granules across the lawn, giving great results every time. All-in-1 is different from other products on the market – it contains high quality ingredients specifically manufactured as one ‘compound’ granule for completely even distribution of all ingredients – so no patches in your lawn and no random results!

Product

Benefits and Features

- Covers up to 100 m².
- Reusable spreading device (with the spreader bottle)
- Refillable with the spout pouch (pictured)
- Easy to apply using the spreader bottle– ergonomic handle design, flip open spout, walk over lawn and let the spreader evenly and accurately apply the granules.
- Kills weeds
- Kills moss
- Feeds & conditions grass
- Greens in 7 days (grass will begin to green after 3 days).

Application

Apply at a rate of 28 g/m², i.e. 2.8 kg covers 100 m²

Directions

- 1) Wait at least 4 days after mowing to treat lawn.
- 2) Cut back surrounding plants to ensure product doesn't come into contact with foliage or roots of desirable plants.
- 3) Holding the spreader by the handle, flip open the spout.
- 4) Holding by your side, tilt the spreader until the granules start to flow. Do not shake the spreader from side to side.
- 5) Walk at a steady pace up and down the lawn in event strips. You should apply at a rate of 35 g/m² - Cover approximately 10 m in 15 seconds.
- 6) Water product in (10 mm) if no rain is expected within 48 hours.

For Best Results

- Ensure complete and even coverage. Applying more quickly in two passes at right angles (e.g. north-south and then east-west) will give the most even application. Avoid over applying.
- Apply before significant rain or water in after application.
- Some problems may require a second application. If required re-treat after 6 weeks.
- Apply in Spring and Autumn when weeds and grasses are growing.
- Do not apply in temperatures above 30°C or below 10°C.
- Rake dead moss out of lawn after 14 days.
- Wait 30 days before re-sowing grass seed.

Caution

- Do not use on lawns newer than 12 months.
- Do not use on cotulla and dichondra lawns or those where clover is being encouraged.
- Do not walk on the lawn until it is completely dry as walking the granules onto other surfaces may stain.
- Do not apply more than 2 times in any one season (3 month period).
- Avoid applying if lawn is under stress or suffering from drought.
- Apply in calm weather to avoid drift onto desirable plants.
- If composting lawn clippings, do not use compost for 6 months.
- May stain paths, saving, slabs tiles, decking and clothing. If spilt on other surfaces brush off immediately to avoid staining. Do not use water to clean surfaces as this may cause staining.
- Avoid contact with skin, may cause irritation.
- Do not inhale, may cause respiratory irritation.
- Wear protective clothing and gloves when using.
- Wash contaminated clothing before reuse.

Available As

- 2.8 kg pack with spreader
- 2.8 kg refill pouch

Active Ingredients

Weed control: 2.86 g/kg 2,4-D, 2.86 g/kg MCPA, 0.57 g/kg Dicamba.

Moss control: 274.3 g/kg Ferrous sulphate.

Fertiliser: N-P-K 10-2-2.

Regulations

Approved pursuant to HSNO Act 1996, HSR101163. See www.epa.govt.nz for approval conditions.
