

KIWICARE®

LawnPro Turfclean & Green +D-Thatch™

For the control of broadleaf weeds, greening and
dethatching lawns

www.kiwicare.co.nz

Background

[LawnPro Turfclean & Green +D-Thatch™](#) feeds and greens lawns while killing lawn weeds and breaking down excessive thatch. The product is supplied with an integrated spray head for clicking onto a hose so there is no mixing or spray equipment required.

Benefits and Features

- Kills lawn weeds and feeds and greens lawn grass
- Easy to use
- Hose end sprayer with ON, OFF and WATER only controls
- Contains fertiliser and soil conditioner for healthy lawn grass
- Contains iron for strong green grass and D-Thatch for stimulating natural thatch breakdown
- Boosted, targeted formulation to give coverage of 230 m²
- New easy to use, unique swivel head which allows you to evenly distribute product
- Ergonomic bottle design to be comfortable to hold, allowing full control and prevent hand strain
- Safe for children and pets once dry
- No mess, no mixing – click onto hose end for easy application with controls for 'ON', 'OFF' and 'WATER' only

Controls

- Broadleaf weeds including [dandelions](#), [daisies](#), [clover](#), [chickweed](#), [Onehunga](#), [dock](#), [plantain](#), [speedwell](#), [thistles](#), [selfheal](#) and many others.
- Thatch build-up

Directions

1. Read label before use.
2. Ensure spray head is turned to 'OFF'.
3. Shake well.
4. Connect garden hose to the spray head.
5. Turn your garden hose tap to on.
6. Pointing the spray head over the lawn, turn the spray head to 'ON'.
7. In a sweeping motion cover the lawn evenly.
8. Turn the spray head to 'OFF' before turning off the house tap.

For Best Results

- Mow 2-3 days before application with the mower height raised a notch or two above normal. This gives time for the cut grass to 'heal' and leaves the weed foliage for the herbicide to act on.
- Hold off mowing after application for 2 weeks. If the lawn 'needs' mowed sooner raise the mower height a notch or two above normal so as not to remove the weed foliage.
- Apply when weeds are actively growing.
- If applying near desirable plants and they are accidentally over sprayed, immediately turn application nozzle control to 'Water' and wash the Turfclean & Green +D-Thatch off the plants.
- Avoid applying if the lawn is under stress or suffering from drought.
- Allow 3-4 weeks for weeds to die.

Caution

- New lawns – do not apply for the first 2 months.
- Do not use on cotulla and dichondra lawns or those where clover is being encouraged.
- Not suitable for buffalo lawns.
- If composting lawn clippings, do not use compost for six months.
- Some burning may occur with fine turf grasses.
- Keep out of the reach of children.

Available As

- 2 Litre Hose End Applicator

Active Ingredients

9.3 g/L Dichlorprop-p, 3.9 g/L Mecoprop-p, 4.8 g/L MCPA.

208 g/L Nitrogen (as urea), 1.8 g/L Iron (as iron EDTA) and fermentation extracts, enzymes and nutrients.

Regulations

- HSNO Approval code: HSR101236
