KIWICARE NO COCKROACHES™ TRAPS

HOW TO CONSTRUCT TRAP

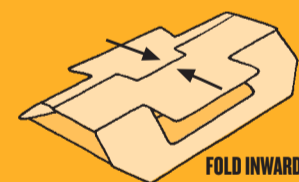

Take off the wax paper covering the adhesive layer before constructing. Tear open foil package to retrieve bait inside small pouch. Leave pouch bait intact and place pouch with bait in the centre of the adhesive layer.

REMOVE

FOLD INWARD

1 2 3 STEP TRAP

- 1. BAIT:** Place small drops of **NO Cockroaches Gel Bait** 30 cm apart where cockroaches have been seen.
- 2. SPRAY & FUMIGATE:** Deny cockroaches hiding places. Spray cracks and crevices where cockroaches hide with **Kiwicare NO Cockroaches Nest Killer Spray**. Fumigate with **Kiwicare NO Cockroaches Fumigator** to flush cockroaches out.
- 3. TRAP:** Trap and monitor for cockroaches using **Kiwicare NO Cockroach Traps**.

DIRECTIONS

Place the traps in dark places such as under or behind fridges and freezers, in larders, under cookers and kitchen sinks, etc.

The traps are effective placed horizontal, vertical and even upside down.

MONITORING

Check the traps weekly, and because eggs and egg cases can lie dormant for some months, continue 1-2-3 cockroach treatment for at least 3 months after catching the last cockroach.

FOR BEST RESULTS

- ✓ For maximum effectiveness set the traps in several places at one time.
- ✓ Change the places if no 'catch' within 5-6 days.
- ✓ Effectiveness lasts about one month after the cover paper is removed.
- ✗ Avoid excessively damp areas.
- ✗ Avoid direct sunlight.

WARNING

The cockroach bait is harmless to humans and animals, but should be kept out of reach of children.

ENVIRONMENTAL CARE

Product is safe for use in all food preparation areas. NZFSA Approved Type D (All animal products except dairy).

STORAGE/DISPOSAL

Dispose of trap in household rubbish. As **Kiwicare Corporation Limited** has no control over the storage or use of this product, no liability is accepted for accidents or damage arising from the incorrect storage or use of this product.
