

KIWICARE®

NO[®]

RATS & MICE

ONE FEED BLOCKS

PROFESSIONAL STRENGTH

10 kg

- Indoor and outdoor use.
- Hole for fixing in place.
- Octagonal blocks give rodents more edges to get their teeth into.
 - Formulated to withstand moisture, damp and heat and will not break down or leach poison.
 - Contains non-target species deterrent.

CAUTION: Keep out of reach of children

Ready to use rodenticide bait for the control of rats and mice in and around buildings.

BAITING STRATEGY

- Eliminate as many alternative food sources as possible.
- Human odours may deter rodents; wear gloves when handling bait.
- Place baits under cover, along walls or rafters and in dark sheltered areas where there are signs of rodent activity.
- For mice — use single bait blocks 5 m apart, or 2 m apart for high infestations.
- For rats — use 1 to 3 blocks 10 m apart, or 5 m apart for high infestations.
- Inspect baits at least every 7 days.
- For effective control continue to replace eaten bait until feeding ceases. Once rodent activity has ceased ensure untaken baits are removed and safely disposed of (see Disposal).
- NOTE: One Feed is sufficient to kill a rat or mouse but they will continue to eat bait.
- It may take up to 2 weeks to control a significant rodent problem

STORAGE

Store tightly closed in the original container in a locked, dry, cool area away from direct sunlight and foodstuffs.

INGREDIENTS

Contains 0.05 g/kg Brodifacoum and 0.01 g/kg human bittering agent Denatonium Benzoate in the form of a bait.

WARNING

May be harmful if swallowed. Repeated oral exposure to high doses may cause damage to the blood system. Harmful to aquatic organisms and terrestrial vertebrates.

PRECAUTIONS

Keep out of reach of children. Wear gloves and avoid skin contact. Wash hands and exposed skin after handling. Avoid contamination of any water supply with product or empty container. Do not place baits in places accessible to children, pets, domestic animals, livestock, birds or where feral animals may have access to baits. Dispose of any carcasses by burial or by wrapping in paper, placing in a plastic bag and putting in the garbage.

DISPOSAL

Before disposing, wrap any untaken or unused baits in a plastic bag and ensure container is completely empty. Do not use container for any other purpose. Dispose of in the garbage.

FIRST AID

If swallowed do not induce vomiting. Immediately seek medical advice or contact the National Poisons Centre on 0800 764 766.

Treatment of domestic animals: Vitamin K1 is an effective antidote against accidental poisoning.

Note to Doctors and Veterinarians: Brodifacoum is a long lasting anticoagulant compound which if ingested by humans, domestic animals or pets, can reduce the clotting ability of the blood and haemorrhage may result. Vitamin K1 should be administered urgently. If administered intravenously the injection must be given slowly.
